	Interstate Commerce Commission: [This Commission was created by act of February 4, 1887, and was charged with the duty of regulating railway rates and facilities for interstate transportation and inquiry into the management of the business of all common carriers subject to its provisions. It was originally attached to the Department of the Interior, but by act of March 2, 1889, this relation was terminated. The publications of the Commission comprise annual reports, which contain information of value in determining questions connected with the regulation of commerce, suggestions as to additional legislation, statement of points decided by the Commission, etc.; statistics of railways issued annually, containing classification of railways and mileage, amount of railway capital, earnings and income, general expenditures, payments on railway capital, etc.; proceedings of annual conventions of the National Association of Railway Commissioners from 1889, and reports and opinions, issued in pamphlet form as rendered and later in bound volumes. These last, however, are not public documents of the U. S., being published by private parties.]
